DETAILED ACTION

Response to Arguments

1. Applicant's arguments filed on 05 August 2004 have been fully considered and they are persuasive.

Allowable Subject Matter

1. **Claims 1-50 are allowed.**
2. The following is an examiner's statement of reasons for allowance: The issued patent (US Patent No. 6,772,341) contains claims which are broader than the present invention at hand. The present invention contains claims which are narrower than the issued patent. The terminology for each invention involves the terms: signed data and enveloped data. As used in the art, signed data is a message digest encrypted with a public key algorithm. In contrast enveloped data is a message digest encrypted with a secret key algorithm in which the secret key algorithm is encrypted with a public key algorithm. In essence, enveloped data is narrower than signed data because it includes the contents of signed data and the contents of a secret key encryption. Furthermore, the reasons for allowance is essentially the same as the reasons as incorporated for signed data, in which the closest prior art (Atkinson et al. (US Patent No. 6,367,012) fails to "modify the enveloped data object through processing of user actions. The processing of user actions occur after the data object has been encrypted which is not shown in Atkinson et al. This distinct feature is found in all of the independent claims.

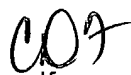

Conclusion

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
